

Åpent foredrag på Kristiania i Oslo, 10. september

I samarbeid med Linjeforeningen og Høyskolen Kristiania inviterer Norsk Osteopatforbund til foredrag med Roger Engel fra Australia. Tema er "The role of manual therapy in the management of respiratory conditions". Målgruppen er klinikere, akademikere, studenter og andre med interesse for muskelskjeletthelse og respiratoriske utfordringer. Foredraget er åpent, og det er ikke behov for påmelding.

Program

15.00 Velkommen og Kaffe

15.15 Innledning ved Helene Søderberg, Linjeforeningen, Tomas Collin, leder NOF, og Ronja S. Lund, studieprogramleder bachelor og videreutdanning i osteopati

15.30 "The role of manual therapy in the management of respiratory conditions", Roger Engel

16.30 Premiere - Visning av filmen "Mitt yrke – Osteopat"

Etter filmen blir det enkel servering og mulighet for nettverksbygging

Roger Engel is an Osteopath and Chiropractor with over 40 years' experience in clinical practice in Australia, the US and Indonesia. He currently holds appointments as Adjunct Associate Professor in the Faculty of Health at Southern Cross University and Honorary Senior Research Fellow in the Faculty of Medicine, Health and Human Sciences at Macquarie University.

Roger is a clinician scientist who has been involved in clinical research for more than 25 years. His research interests cover several fields including the non-pharmacological management of chronic respiratory disease, pediatric and maternal care, and more recently post-concussion syndrome. He has authored over 75 papers in peer-reviewed journals and supervises PhD and master's research students.
